INTRODUCTION

This report covers the calendar year 1984, and is in two sections. The first section provides estimates of out-of-province shipments of agricultural products while the second section deals with estimates of the value of out-of-country exports.

SOURCES AND METHODS

Out-of-province shipments, as used in this report includes shipments to other provinces as well as out-of-country exports. The methodology employed in estimating out-of-province shipments called for data from various sources, including industry.* Certain commodities have been aggregated to maintain the confidentiality of the industry, while every effort has been made to maintain the same commodity listing as used by Statistics Canada.

The primary sources of data for out-of-country exports were Statistics Canada Catalogues 65-003 (Exports by Countries) and 65-004 (Exports by Commodities), supplemented with provincial level information from the Alberta Bureau of Statistics and other Statistics Canada publications.

A number of adjustments and revisions were made to Statistics Canada's exports by province of lading data to arrive at estimated Alberta exports as reported in this publication. These adjustments were necessary to overcome inadequacies in the province-of-lading concept which, in many cases, does not provide export information by province of origin. This is especially true for exports of grain and oilseeds where a landlocked province such as Alberta has its exports grossly underestimated. The information necessary to adjust Statistics Canada data for Alberta exports was gathered from many sources within Alberta Agriculture, other government departments and industry.

In particular, the figures reported for grains and oilseeds and their products have been adjusted to reflect provincial production statistics and actual shipments for the calendar year 1984.

* Readers who wish to obtain details of the methodology used in this report are requested to contact the author directly.

OUT-OF-PROVINCE SHIPMENTS

The revised estimated value of 1983 out-of-province shipments of all agricultural commodities (excluding fertilizers) was $3,502 million. The estimated value of out-of-province shipments for 1984 was $3,992 million (excluding fertilizers), an increase of $490 million or 14 per cent.

On a dollar value basis, grains and oilseeds accounted for 54 per cent of the total value of shipments in 1984 while meats, live animals and animal products made up 34 per cent of the total. These figures for 1984 compare with 58 per cent for grains and oilseeds and 32 per cent for meats, live animals and animal products for 1983.

The value of grain shipments increased by about 7 per cent over 1983 while the combined value of live animals, all meats and animal product shipments showed a significant increase of 21 per cent.

OUT-OF-COUNTRY EXPORTS

HIGHLIGHTS

The revised value of Alberta's out-of-country exports of agricultural products in 1983 was estimated to be $2,080 million or 59 per cent of out-of-province shipments. In 1984, this value was estimated to be $2,291 million, or 57 per cent of out-of-province shipments. This represents a dollar value increase of $211 million over 1983 (10.1 per cent), while the corresponding increase in Canadian agricultural exports was $833 million (8.2 per cent). In 1984, Alberta accounted for approximately 21 per cent of total Canadian agricultural exports, unchanged from 1983.

Wheat exports continue to be the largest agricultural export earner for Alberta, accounting for over 50 per cent of the total value of exports, while canola and its products accounted for more than $390 million or 17 per cent of export earnings, surpassing barley exports for the first time. The value of barley exports fell by 25 per cent from 1983, although it continues to be an important export crop, contributing $284 million to total export earnings. Reduced stocks and production rather than loss of exports markets contributed to the decline in Alberta barley sales.

The value of live animal exports from Alberta (principally live cattle and hogs) increased by more than 75 per cent from $78 million in 1983 to $138 million in 1984. This sharp increase was largely due to record shipments of live hogs and cattle to the United States.

The value of meat exports (principally beef, pork and horse meat) showed a 13 per cent increase over 1983. Canola oil and meal exports showed a significant increase over 1983, climbing from $39 million to $125 million in 1984. Honey and dehydrated alfalfa continued their upward export trend, increasing by 130 and 22 per cent respectively over 1983.

Other important Alberta agricultural exports in 1984 were whiskey, cattle hides and peat moss.

TRADING PARTNER ANALYSIS

In 1984, Alberta's eight most important export markets were U.S.S.R., Japan, United States, People's Republic of China, Brazil, East Germany, India and the United Kingdom, respectively. Together these countries purchased an estimated 74 per cent of Alberta's agricultural exports.

U.S.S.R.

The value of Alberta exports to U.S.S.R. bounced back in 1984 after a decline in 1983. The U.S.S.R. imported more than $494 million worth of agricultural products from Alberta, consisting mainly of wheat ($472 million) and barley ($20 million). Although Canada shipped more wheat to the U.S.S.R. in 1984, barley shipments were drastically reduced from the previous year. However, the U.S.S.R. is expected to continue to be the most important market for Canadian wheat.

JAPAN

Japan's imports of Alberta agricultural products totalled an estimated $461 million in 1984, an increase of approximately $50 million from the revised estimates of $410 million for 1983. Japan continues to be the largest export market for Alberta canola, importing more than 74 per cent of the Alberta total. It is also the largest market for dehydrated alfalfa and barley malt. Beef exports to Japan showed a slight increase over 1983, but pork exports declined considerably. Japan remains an important market for Alberta wheat and barley, importing an estimated $147 million worth in 1984.

UNITED STATES

The estimated value of Alberta's exports to the U.S. increased by more than 42 per cent over 1983, mainly due to record shipments of live cattle, hogs, beef and pork in 1984. Total exports to the U.S. were estimated at $300 million in 1984. Live cattle exports from Alberta increased from $56 million in 1983 to $92 million in 1984, a 63 per cent increase, while live hog exports went from $8 million to $40 million, a five fold increase.

Beef shipments to the U.S. increased in value by $1.3 million while pork shipments quadrupled in value.

Other Alberta agricultural commodities that enjoyed great success in the American market in 1984 were honey, canola meal and peat moss. With the granting of GRAS (Generally Regarded As Safe) status to canola oil, the American market is expected to grow for this important Alberta product.

Continued strength in the American economy coupled with the strong American dollar and the possibility of freer trade between Canada and the U.S., could result in significant increases in Alberta agricultural exports in 1985.

PEOPLE'S REPUBLIC OF CHINA

Alberta's exports to China decreased from an estimated $222 million in 1983 to $160 million in 1984, for a 28 per cent decline. This was mainly due to decreased wheat and barley shipments in 1984. China is expected to decrease its imports of grains in the coming years as it moves towards increased production and self-sufficiency. This is expected to be reflected in declining Alberta agricultural exports to that country.

UNITED KINGDOM

The value of Alberta's agricultural exports to the United Kingdom is estimated to have declined from the revised total of $65 million in 1983 to $53 million in 1984 (a 34 per cent decline). This was mainly due to decreased shipments of wheat and feeds of vegetable origin. However, shipments of canola oil showed a significant improvement over 1983.

OTHER EEC AND WESTERN EUROPE

Export trade in 1984 with other EEC and Western European countries showed a decline of approximately $40 million or 20 per cent from 1983. Again, this decline is a result of reduced shipments of wheat and barley to these countries. Canola exports, however, showed a marked increase, going from approximately $7 million to over $45 million. Much of this increase was accounted for by exports to the Netherlands and West Germany.

EASTERN EUROPE (excluding U.S.S.R.)

The total value of Alberta agricultural exports to Eastern European countries other than the U.S.S.R. declined from $94 million in 1983 to $81 million in 1984, a 13 per cent reduction. This was mainly due to drastically reduced shipments of wheat and barley to Poland. Poland has ceased to be an important market for Canadian grain. In 1982, Poland imported an estimated $352 million worth of wheat and barley from Canada. This was reduced to only $17 million in 1984. In contrast, East Germany continues to be an important export market for Canadian barley, importing an estimated $152 million worth in 1984.

MIDDLE EAST

Virtually all export trade between Alberta and the Middle East continues to be in wheat and barley. The market for Canadian wheat in Iran is at an all time low and exports in 1984 were virtually nil. On the other hand, Iraq continues to be one of the larger markets for Canadian wheat in this region.

The total value of Alberta exports to the Middle East increased from $137 million in 1983 to $167 million in 1984, a 22 per cent increase. Egypt has re-emerged as a key market in the Middle East for Alberta wheat.

AFRICA

In 1984 total Alberta export trade with African countries was small ($71 million) compared to other regions, although it did increase from 1983 (49 per cent increase). Larger wheat exports to Algeria contributed to this upward trend.

ASIA-PACIFIC (excluding Japan and People's Republic of China)

Alberta export trade with countries other than Japan and the People's Republic of China in the Asia-Pacific region increased by 43 per cent over 1983. The estimated value of exports went from $114 million in 1983 to $164 million in 1984. Although wheat shipments to Bangladesh were down in 1984, significant export sales of canola oil and barley to India, Malaysia and Singapore more than made up for this decrease. Canola oil exports to India accelerated from $9 million in 1983 to an estimated $43 million in 1984, making that country the largest single market for Alberta canola oil.

In 1984, there were no significant changes in Alberta exports to Australia and New Zealand.

SOUTH AMERICA

Increased wheat and canola oil exports from Alberta in 1984 boosted total export sales to South America to $103 million from the 1983 total of $88 million. Brazil continues to make large purchases of wheat ($83 million) and shipments of canola oil to Peru doubled the total value of agricultural exports to that country in 1984.

CENTRAL AMERICA AND THE CARIBBEAN

Mexico did not import any Canadian wheat in 1984. This compares to an estimated $76 million worth of wheat imports in 1983. Wheat shipments to Cuba were also down in 1984 and this resulted in an overall decrease of $18 million in the value of Alberta exports to Central America. However, Mexico purchased an estimated $11 million worth of canola from Alberta in 1984. This new market for Canadian canola is expected to grow in the future.

Alberta's total value of agricultural exports to Central America and the Caribbean dropped from $85 million in 1983 to $68 million in 1984, a 22 per cent decline.
